1. Did you find the tutorials useful?

2. Did your problem solving skills improve in this course?

3. Did you learn new mathematical skills during the course?

4. Did your physical understanding of the materials improve by taking this course with this instructor?

5. Was the instructor amply available after class?

6. Did he give you time for questions during class?

7. Did he try to make the class interactive by asking questions?

8. Would you have found the material much harder had you done it yourself instead of learning it through this class and instructor?
