

Additions and Corrections

Vol. 7, 2007

Timothy J. McDonald, Drazenka Svedruzic, Yong-Hyun Kim, Jeffrey L. Blackburn, S. B. Zhang, Paul W. King,* and Michael J. Heben*

Wiring-Up Hydrogenase with Single-Walled Carbon Nanotubes.

Page 3528. Following publication of our work, published on the Web October 30, 2007 (ASAP) and published in the November 2007 issue (Vol. 7, No. 10, pp 3528–3534), we became aware of parallel work (*Nano Lett.* **2007**, 7(6), 1603–1608) by M. Asunción Alonso-Lomillo, Olaf Rüdiger, Angel Maroto-Valiente, Marisela Velez, Inmaculada Rodríguez-Ramos, F. Javier Muñoz, Víctor M. Fernández, and Antonio L. De Lacey, titled “Hydrogenase-Coated Carbon Nanotubes for Efficient H₂ Oxidation”.

Although both papers represent original contributions, we would like to remove the claim of “first example” from our manuscript.
