

This is a list of project topics:

1. Thermodynamics of Driven Systems.
2. Energy in Human and Animal body.
3. Tidal and Wave.
4. Fuel Cells.
5. Thermo-electric Devices.
6. Modes of Transportation (Cars, Trucks, Ships, Planes, etc).

This is a list of project topics done by the students in spring 2013 followed by their last name:

1. Electric Grid, Wurm
2. Energy for Producing, Using and Disposing Electronic Gadgets, Deitz
3. Batteries, Gabriel
4. Motors and Turbines, Brown
5. Unconventional Oil and Gas, Phillips
6. Energy and Embodied Energy, Wierwille
7. Wood as Furniture, Construction material and Bio Fuel, Galang
8. Thermodynamics of Driven Systems, Hegarty
